The Nobel Laureates' Guide to the Smartest Targets for the World 2024-2030 is a new report that identifies the most critical SDGs for global progress. The report is based on the insights of Nobel Laureates, who are some of the world's leading experts in their fields. The report provides a roadmap for achieving these goals, and it highlights the role of science, innovation, and collaboration in this process.

The report identifies six Smartest Targets for the World 2024-2030:

1. End poverty in all its forms everywhere.
2. Achieve zero hunger and ensure access to food for all year-round.
3. Ensure healthy lives and promote well-being for all at all ages.
4. Ensure access to affordable, reliable, sustainable, and modern energy for all.
5. Promote sustained, inclusive, and sustainable economic growth, full and productive employment, and decent work for all.
6. Take urgent action to combat climate change and its impacts.

These six targets are essential for achieving the SDGs by 2030. They address the most pressing challenges facing the world today, and they will require a concerted effort from all sectors of society. The report provides a detailed roadmap for achieving these goals, and it highlights the role of science, innovation, and collaboration in this process.

Science and Innovation

Science and innovation are essential for achieving the SDGs. They provide the knowledge and tools we need to address the challenges of poverty, hunger, disease, and climate change. The report highlights the importance of investing in research and development, and it calls for a global effort to share knowledge and technology.

The report also emphasizes the need for innovation. Innovation is the process of turning new ideas into practical solutions. It is essential for developing new products, processes, and services that can help us achieve

the SDGs. The report calls for a culture of innovation, and it encourages all sectors of society to participate in the innovation process.

Collaboration

Collaboration is essential for achieving the SDGs. No one country or organization can achieve these goals alone. We need to work together to share knowledge, resources, and best practices. The report calls for a global partnership for sustainable development, and it highlights the importance of involving all stakeholders in the process.

Collaboration is also essential for ensuring that the SDGs are achieved in a sustainable way. The SDGs are interconnected, and they need to be addressed in a holistic way. The report calls for a systems approach to sustainable development, and it emphasizes the need to consider the long-term impacts of our actions.

The Way Forward

The Nobel Laureates' Guide to the Smartest Targets for the World 2024-2030 is a call to action. It provides a roadmap for achieving the SDGs by 2030, and it highlights the role of science, innovation, and collaboration in this process. The report is a valuable resource for governments, businesses, and civil society organizations around the world.

We must all work together to achieve the SDGs. They represent a roadmap for a sustainable future, and they will require a concerted effort from all sectors of society. By working together, we can build a better world for all.
