

The Nuberniks: Counting Backwards From 10 First Numbers

Once upon a time, in the enchanting land of Numbertown, there lived a group of extraordinary creatures called the Nuberniks. These playful and lovable characters had a unique and important mission: to help children learn about numbers and counting in a fun and engaging way.

Dimensions : 6 x 0.67 x 9 inches

One sunny morning, as the Nuberniks gathered in their cozy clubhouse, they decided to embark on a special adventure. They wanted to explore the world of counting backwards, starting from the number 10.

With a cheerful skip and a giggle, the Nuberniks set off on their journey. At the forefront was Number Ten, a tall and elegant Nubernik with a bright red crown. Next came Number Nine, a cheerful fellow with a bouncy blue hat. Number Eight followed closely behind, with her sparkling green pigtails.

And so on, each Nubernik lined up in perfect order, their colorful numbers standing out against their playful costumes.

#BACKWARDS

20	19	18	17	16	
	15	14	13	12	11
10	9	8	7	6	
	5	4	3	2	1

It is as important to practice counting backwards from 20 as it is counting up to 20 for children in KS1.

As they walked, the Nuberniks sang a cheerful tune to help them remember the order of the numbers:

“

“Ten, nine, eight, seven, six,

Five, four, three, two, one,

Counting backwards is so much fun!”

They skipped and hopped and twirled, their laughter echoing through the streets of Numbertown. Along the way, they encountered curious residents who asked them what they were up to. The Nuberniks proudly explained their mission, and the residents joined in on the counting fun.

As the Nuberniks counted backwards, they pointed out different objects around them. They counted the windows in the houses, the flowers in the gardens, and even the spots on a friendly dog. This helped them connect the numbers to real-life scenarios, making the learning process more interactive and meaningful.

By the time they reached the end of their journey, the Nuberniks had mastered the art of counting backwards from 10. They had not only learned a valuable math skill but had also created lasting memories with their friends.

From that day forward, the Nuberniks continued their playful teaching adventures, spreading the joy of numbers throughout Numbertown. They became known as the best number teachers in the land, inspiring young minds to embrace math with confidence and excitement.

So, if you ever find yourself wanting to learn about counting backwards, remember the Nuberniks and their enchanting journey. With their help, you

too can become a counting champion and discover the wonderful world of numbers.
